DETAILED ACTION

Allowable Subject Matter

Claims 14-35 allowed.

The following is an examiner's statement of reasons for allowance: Claims 14-35 were found allowable over the prior art because no where in the prior art, including JP 05-502686 and JP 07-292167, in a polyurethane reaction was there evidence of reacting an polyurethane prepolymer made from a polyisocyanate and a polyol with a dimer of a linear olefin and in particular the dimers as claimed in claims 16 and 18-25. The closest prior art U.S. Patent No. 4,355,130 to Heinze disclosed polymerizing 1-decene, which is a linear olefin having 10 carbon atoms, to produce only trimers and tetramers (Column 4, lines 19-20), not dimers of the linear olefin. Further, Heinze utilized phthalic ester as a plasticizer, the invention and claims are designed to replace phthalic ester plasticizers with the dimers of linear olefins. JP 07-292167 discloses using a tetramer or pentamer of 1-decene as a softening agent and JP 05-502686 uses phthalate esters as the plasticizers for softening the final polyurethane product.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
